The Great Treasure from Taiwan – Taiwan Hinoki

Taiwan Hinoki is the precious tree species located in Alishan divine tree forest. Due to the harsh environment, it has very meticulous structure, rigid properties, not easy to rot, and not afraid of borers. It is the best species of the 7 cypress species in the whole world.

The elegance smell of Taiwan Hinoki, its delicate texture and rigid structure is well-known internationally. At the time around 1900s, Taiwan was once a colony to Japan. Japanese hewn lots of hinoki trees and use as the best building materials for palace and temples. Now the lasting hinoki trees were classified as protected species and was treated very carefully.

How long haven't you enjoy fresh and clean air?
